

Eric Kaster, Eelek co-owner & designer... with Illuminata pendant

LIGHTING

Lighting is our passion and our specialty. Our award-winning luminaires offer the most advanced energy-saving lamping technologies as well as recycled materials with high post-consumer content. Most importantly, we offer inspired designs that you won't find anywhere else. Choose from our diverse lighting lines or let us design a custom light for your project.

ELEEK IS A SUSTAINABLE DESIGN and manufacturing business specializing in beautiful, durable building parts crafted by hand using time tested processes and materials. In addition to lighting, sinks, hardware and tile, Eelek offers custom design and manufacturing as well as lighting restoration and retrofitting services. Eelek was founded in 2000 by third-generation patternmaker Eric Kaster and his marketing-savvy partner Sattie Clark, based on their ideals of environmental and social sustainability. Eelek uses the framework of the Natural Step Network to define its goals and gauge its progress.

Eelek is very proud to be named among Sustainable Industries Top Ten Green Building Products four years in a row, and the City of Portland has recognized Eelek for its sustainable practices.

Eelek is one of 25 companies selected by *Business Week* in 2010 as "America's Most Promising Social Entrepreneurs."

LIGHTING RESTORATION + RETROFITTING

With our expertise in building light fixtures using time-tested materials and techniques, it was a given that sooner or later we would be asked to restore light fixtures with historic value. We have the ability to do large-scale full-service restoration, going far beyond just cleaning and rewiring. Our full service restoration can include historical research and archiving, complete replication of luminaires, installation of LED or pin-based CFL lamping, and ETL listing.

HARDWARE + TILE

Eleek makes several lines of cast metal hardware in recycled aluminum, bronze and lead-free pewter. Our newest line, Masa cabinet hardware, is cast of 100% scrap aluminum we get locally from The ReBuilding Center (see ProjectScrap.Org for more information). Eleek is very proud to have won the Sustainable Industries Top Ten Green Building Products for its Masa hardware.

We also offer bold, recycled aluminum and bronze cast metal tile in our signature River Rock aluminum finish and oil-rubbed or raw bronze finishes.

CAST METAL SINKS

Eleek cast bronze sinks are the last sinks you will ever need to buy. You will bequeath them to your grandchildren. They will bequeath them to theirs. The embodiment of non-obsolescence handcrafted of high post-consumer recycled material. Everything about these sinks feels substantial, grounded and authentic. They are objects of art so durable and functional that it makes recyclability a non-issue (but of course they are also recyclable).
