

ELEEK IS A SUSTAINABLE DESIGN and manufacturing business specializing in beautiful, durable building parts crafted by hand using time tested processes and materials. In addition to lighting, sinks, hardware and tile, Eleek offers custom design and manufacturing as well as lighting restoration and retrofitting services. Eleek was founded in 2000 by third-generation patternmaker Eric Kaster and his marketing-savvy partner Sattie Clark, based on their ideals of environmental and social sustainability. Eleek uses the framework of the Natural Step Network to define its goals and gauge its progress.

Eleek is very proud to be named among Sustainable Industries Top Ten Green Building Products four years in a row, and the City of Portland has recognized Eleek for its sustainable practices. Eleek is one of 25 companies selected by *Business Week* in 2010 as "America's Most Promising Social Entrepreneurs."

**RECYCLED CAST
TILE**

CAST METAL TILES

Eleek's cast metal tiles are made from recycled aluminum (100% recycled, with at least 70% post-consumer content) or bronze (at least 90% recycled and at least half of that post-consumer material).

Smooth to the touch, solid and strong yet light and organic in look and feel, Eleek's aluminum tile is softly speckled like river rock. Bold and luminous, Eleek's bronze tile is a timeless statement. Whatever you choose, you will thrill to the authenticity of these tiles every day.

We ship them finished with a simple paste wax which protects them from moisture without impeding their simple, natural beauty. If there will be moisture where you install them, we recommend that you re wax them occasionally.

STANDARD TILES

Eleek cast metal tiles come in five standard sizes as shown. The tiles can be used indoors or outdoors—any place free from standing water or constant moisture. Decorative Pyramid 4 3/8" tiles are also available (see opposite top).

The tiles are 5/16" thick, including a corrugated backing that is a part of the casting (lending structural integrity and better adhesion).

CUSTOM EXTRUDED ALUMINUM TILE

Eleek also offers extruded aluminum tiles in specifiable sizes and in quantity. These are similar to our cast tiles but with sharper edges and no corrugated backing. Call to inquire.

Pyramid Tile available in 4-3/8"
